Acknowledgement

Receipt is acknowledged of the Amendment filed April 5, 2004.

Reasons for Allowance

Claims 27-38 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Tsugaru, taken alone or in combination of other references, does not teach or fairly suggest a level-shifting input receiver circuit or a method for level-shifting a received signal comprising, among other things, differentially comparing the first and second input signals to generate a differential current signal and providing a resistive load coupled in series with a pulling current source between an internal power supply voltage and a ground supply voltage (claim 27); and driving an NMOS differential pair with the first and second input signals to obtain an intermediate differential current signal; and reflecting the intermediate differential current signal through a PMOS current mirror pair configured to draw current from the external power supply voltage in order to generate the differential current signal (claim 36), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
